

# Introduction to $\text{\LaTeX}$

## Where?

University of Cologne  
Institute for Geophysics and Meteorology  
Pohligstr. 3, 50969 Cologne  
CIP-Pool (3.134)

## When?

26<sup>th</sup> and 27<sup>th</sup> of April, 2017  
10 a. m. – 7 p. m.

## Registration (max. 12 students)

by 23<sup>rd</sup> of April 2017  
by submission of your full name, institute and mail address to  
Robert Rauterkus (r.rauterkus@uni-koeln.de)

## About this workshop

**Day 1:** The first part of this workshop introduces you to the basic principles of  $\text{\LaTeX}$ . Starting with a short introduction to its syntax, you will learn afterward how to format stuff, include float elements like graphics and tables, build and use own commands, create nice-looking equations, and much more.

**Day 2:** This is the more creative part of this workshop. You will apply and enhance your knowledge of part one in daily researchers situations – how to cite, create posters and presentations, and much more.

**Note:** You need an account at the RRZK to participate (please take care that you know the login of your students or employees account - in case you have no account, please contact Robert Rauterkus).
