

Introduction to \LaTeX

Where?

University of Cologne
Institute for Geophysics and Meteorology
Pohligstr. 3, 50969 Cologne
CIP-Pool (3.134)

When?

6th and 8th of March, 2019
9.30 a.m. – 5.30 p.m.

Registration (max. 12 participants)

by 1st of March 2019
by submission of your full name and course code 2019-P2P01 to
gsgs-admin@uni-koeln.de

About this workshop

Day 1: The first part of this workshop introduces you to the basic principles of \LaTeX . Starting with a short introduction to its syntax, you will learn afterward how to format stuff, include float elements like graphics and tables, build and use own commands, create nice-looking equations, and much more.

Day 2: This is the more creative part of this workshop. You will apply and enhance your knowledge of part one in daily researchers situations – how to cite, create posters and presentations, and much more.

Note: You need an account at the RRZK to participate (please take care that you know the login of your students or employees account - in case you have no account, please contact Robert Rauterkus (r.rauterkus@uni-koeln.de)).
